Get Your **FREE** Self-sovereign Identity

1

Download Verus Mobile

- ✓ Create a new profile and follow the steps
- ⚠ Don't forget to write down the 24 words

verus.io/wallet

2

Get QR-code to claim your VerusID

Come by the Verus community booth (1245) and ask for a QR-code.

OR

Go to the Verus Discord verus.io/discord

Go to the [#valuverse](#) channel and type `/getid`

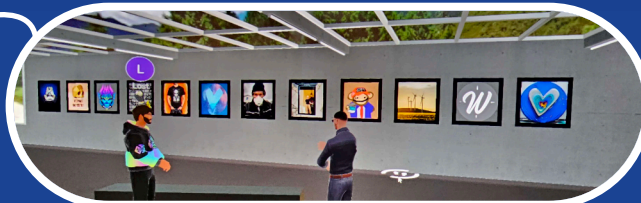

Scan the QR-code with Verus Mobile and follow the steps

verus.io/discord

live.valuverse.net

Login to the ValuVerse with your VerusID!

A VerusID is a wallet & self-sovereign identity you own completely. Empowering you with autonomy both online and offline.

Send & receive assets.

The friendly-name address is perfect for easily sending and receiving crypto assets.

Valuing your privacy

Send and receive native assets with complete privacy. Only share identity data you want to share.

Autonomous key recovery.

Set up revoke and recovery authorities. Never worry about losing your VerusID or the assets on it.

Real data ownership.

Only you give explicit permission what happens with the data attached to your VerusID.

Safe with Verus Vault.

Safely lock away assets for theft-proof staking, trusts, inheritance, vesting periods or the infamous \$5 wrench attack.

Forever yours.

The VerusID is yours forever, given to you by the protocol. No renewal necessary. No fees to pay.

Unforgeable signatures.

Create unforgeable, verifiable signatures for documents, messages, hashes, or any kind of file.

Store & publish data.

Each VerusID has a controlled public storage system. Store and publish data with multiple levels of nesting.

The free VerusID you own is actually a subID of the **ValuID@** namespace, from which the ValuID token currency was launched. It is in everything exactly the same as a root VerusID, except it can not launch currencies (e.g. tokens, liquidity pools) or PBaaS-blockchains.
